Amendments to the Claims

1-9 (withdrawn) CANCELED

- 10. (original) In a process for progressively reducing a thickness of a thin-film layer on a surface of a substrate, a method for detecting a process endpoint representing a minimum desired thickness of the thin-film layer, the method comprising:
- (a) directing a probe light onto a region of a surface of the thin-film layer to produce a signal light propagating from the thin-film layer;
 - (b) detecting the signal light;
- (c) measuring a spectral characteristic of the signal light from the detected signal light to produce a spectral-characteristic signal;
- (d) calculating a cross-correlation function of the spectral-characteristic signal with a predetermined reference spectral-characteristic signal, the cross-correlation function exhibiting a change with a corresponding change in the thickness of the thin-film layer; and
 - (e) from the cross-correlation function, determining the process endpoint.

11. (withdrawn) CANCECED

12. (canceled)

- 13. (currently amended) The method of claim 1223, wherein the parameter is selected from the group consisting of a difference between a largest local maximum of the signal waveform and a smallest local minimum of the signal waveform.
- 14. (currently amended) The method of claim 1223, wherein the parameter is the smallest local minimum of the signal waveform.
- 15. (currently amended) The method of claim 1223, wherein the parameter is a quotient of the smallest local minimum of the signal waveform to the largest local maximum of the signal waveform.

Attorney Reference Number 4641-59261 Application Number 09/881,445

DLS:vjg 01/13/04 244259.doc PATENT

- 25. (original) The method of claim 24, including the step of varying a size of the aperture so as to cause the aperture to pass only the zeroth order of signal light.
- 26. (original) The method of claim 23, wherein step (b) is performed by providing a two-dimensionally distributed measurement of a spot pattern of the signal light while blocking the higher orders of signal light.
